

Mr Aamir Ismailjee

Consultant Ophthalmic Surgeon

Locations:

Optegra London Eye Hospital
Optegra Eye Hospital Maidstone

Mr Aamir Ismailjee is a distinguished eye surgeon with dual qualifications in Optometry and Ophthalmology, a rare combination that provides him with extensive expertise in refractive treatments. His ophthalmic training was completed in the prestigious North Thames rotation, followed by two subspecialist fellowships in cornea, cataract, and refractive surgery at Moorfields Eye Hospital.

He completed his undergraduate education at City University London, specialising in refractive surgery, and earned his medical degree from the University of London, attending Barts and The London Medical School. Mr Ismailjee holds the Certificate for Laser and Refractive Surgery from The Royal College of Ophthalmologists, certifying his competence in performing laser eye surgery and clear lens exchange.

Passionate about providing the best possible outcomes and experiences for his patients, Mr Ismailjee continually achieves excellent results. He remains at the forefront of healthcare by attending multiple conferences annually and actively engaging in audit and scientific research, with numerous publications in esteemed journals.

What first attracted Aamir Ismailjee to ophthalmology?

In 2013, Mr Ismailjee opted for refractive surgery to eliminate his need for glasses. He describes the experience as life-changing and the best decision he ever made. Inspired by his own experience, he specialised in this field to provide similar transformative benefits to others. He enjoys building relationships with his patients and takes great satisfaction in significantly improving their quality of life.

Patient Feedback

I am eternally grateful to you for correcting my failing eye sight. You did a YAG Capsulotomy on both eyes and the improvement is so great I can hardly believe how much I was missing. I can read the newspaper again and see colour vividly. I don't even need new glasses as my present ones are fine. I can not thank you enough for what you have done for me.

My whole experience was excellent from the lady on the desk to the young man who tested my eyes and finally your care and patience with me - an old lady of 87.

I would like to say a big thank you to Mr Aamir Ismailjee along with all the clinical staff who were supportive during my eye surgery.

Mr Mohammed Aamir Ismailjee is very polite and professional. He helped me make my decision about the eye operation as I do suffer from severe anxiety and depression.

He and the team are an asset - angels of blessings.

I was found to have cataracts in both eyes after being tested at a local Specsavers and being referred to the cataract clinic as they had started to affect my day to day quality of life.

During the initial assessment I was thoroughly examined by Mr Aamir Ismailjee and he explained I had cataracts in both eyes - worse in the left eye but needing an operation on both eyes. He patiently explained to me in detail the nitty-gritty of the operative procedure under local anaesthetic that will make me feel numb but I won't feel the pain.

Honestly speaking, there was a bit of built-up worry, anxiety and some trepidation in the days leading up to the appointment day, naturally. But the courteous manner and professionalism Mr Ismailjee showed to me was so amazing that this worry was dispelled completely.

Throughout the operation I was kept fully informed of the operative stages and the progress all along. Most importantly I was reassured repeatedly that the operation was progressing well, he kept asking if I was comfortable and this certainly helped me feel calm and relaxed.

The operation was successful without any postoperative concern, so I was able to go home with my wife and a comprehensive set of instructions for the next 4 weeks.

The whole team were fantastic, but Mr Ismailjee in particular is great. He is courteous and caring while maintaining high standards of professionalism throughout, and explained everything in simple language without using technical medical jargon.

So I say thank you again from the bottom, middle and top of my heart for his world-class service and unrivalled care.
