

Mr Amir Hamid

Chief Medical Officer and
Consultant Ophthalmic Surgeon

Locations:

Optegra London Eye Hospital

In 2012 Mr Hamid received the Certification in Laser Refractive Surgery by the Royal College of Ophthalmologists (CertLRS). He is skilled in performing SMILE, Presbyond, LASIK and LASEK laser vision correction procedures as well as the use of the most advanced multifocal intraocular lenses. Additionally, he is certified in the use of the Artisan Iris Clip lenses and the Staar Visian ICL, ideal for patients unsuitable for laser vision correction.

Improving patient outcomes is fundamental to his practice and so he is involved in the evaluation of new intraocular lenses prior to market launch, teaching surgeons how to perform laser vision correction, refractive lens exchange or refractive cataract surgery.

He is regularly invited to speak and teach at national and international vision correction conferences. In addition he is a highly acclaimed clinical investigator, always at the forefront of new refractive treatments and technologies. He regularly presents his published scientific articles and papers at the cataract and surgery conferences in the UK, Europe and US and is a manuscript reviewer for the British Medical Journal.

Mr Hamid was born in Malaysia and lived there until 1992. He now lives in London with his wife and young family.

- AVIVA
- Allianz
- AXA
- BUPA
- BUPA International
- Healix

“ ”

What first attracted Amri Hamid to ophthalmology?

For Mr Hamid, the decision to specialise in ophthalmology came from a blend of technical fascination and human impact. “I trained in ophthalmology because I was fascinated by how delicate and precise eye surgery is, and how transformative it can be for patients. Vision is such a fundamental sense, and restoring or improving it has an immediate, life-changing impact. That combination of technical skill and patient benefit inspired me to specialise in this field.”

Patient Feedback

I had the privilege of being treated by Mr. Hamid at Optegra Eye Clinic, and I'm incredibly pleased with the experience. Mr. Hamid is a true professional who combines his expertise with a friendly and reassuring approach. He made sure I was well-informed about the procedure and answered all of my questions, which really put me at ease. The surgery went smoothly, and the results exceeded my expectations. His attention to detail and genuine care for his patients is evident. I would wholeheartedly recommend Mr. Hamid for anyone in need of eye surgery.

He was very professional and knowledgeable and easy to talk to. The procedure was very quick and the results are outstanding. I was very happy with Mr. Hamid.

Friendly, personable and knowledgeable. Mr Hamid was recommended to me by a previous happy customer and I'll happily be recommending him to others.

Doctor Hamid is clearly experienced, has a light hearted approach and smile on his face. Overall, I had a positive patient experience with him. A few improvements to note for the future based on my experience: - I had the impression, both in the 1st call and on the day of surgery, that he was in a hurry and was looking forward to cut it short with me. - The first appointment with him was scheduled as video call and I was expecting that, however it was run by telephone. This uncommunicated and unexplained change in the moment made me uncomfortable because as a patient I'd like to build trust and ease up with the surgeon.

Mr Hamid was friendly, approachable and answered any concerns I had from the very beginning. I am extremely pleased with the surgery he carried out and he made me feel very comfortable from the get go after visiting Optegra.
